

SEAMING MACHINE

BASIC & ECONOMICAL

Dracup UK Ltd offer a superior range of basic precision seaming / fabric joining machines. These are used primarily for the production of high grade forming fabrics for the paper industry. Machines have 200 to 880 needles capacities.

Jacquard heads can be either a straight lift or oblique shed for both top and bottom shed lines of the harness. Dracup seaming machines may be sited above and below the fabric joining table.

Selection is either mechanical with the utilisation of jacquard card or electronically via the NES selection mechanism with integrated operator interface terminal to store seam patterns.
